DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, 12-14, 15-19, 25, 26, 35, 36, and 40-43, drawn to the combination SLIC and transient output current limit circuit, classified in class 379, subclass 413.
- II. Claims 7-11, 20-24, 27-34, and 37-39, drawn to the subcombination detailing the output current limit circuit, classified in class 323, subclass 312.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claim 1, which is an evidence claim (MPEP § 806.05(c) III) includes the combination of a SLIC and a output current limit circuit, however, the detail of the output current limit circuit is not listed, therefore, claim 1 does not rely on the details of the output current limit circuit for patentability. In addition, the combination and the subcombination have been shown above to be classified in diverse areas of prior art. The subcombination has separate utility such as

for use in voltage amplifier circuits (see applicant's specification page 15, last paragraph through page 16, first paragraph).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to the applicant's representative of record, Mr. Regan on 04 August 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
